Purchase and enjoy your Spas N Stuff hot tub with confidence.

56 Frame Pumps = Quiet and Energy Efficient

Your Spas N Stuff hot tub is equipped with Flo-Master®"XP2e" 6.0 BHP, 56 Frame pumps. (some models have one pump, some have two).

56 Frame pumps produce more power and use less energy. Their increased efficiency allows them to operate cooler and quieter and last much longer than a 48 frame pump.

56 Frame pumps provide plenty of power for your soothing massage therapy while still offering quiet operation and energy efficiency.

S-Class Spa Controls – Laguna Lounger Series

We use a state of the art electronic control system to ensure safe and reliable operation of your spa.

The S-Class control system comes with a user friendly, 4 button Touch Key control pad with bright LED display. The electronic control pad allows control to all spa functions with the touch of a button.

The S-Class control system also includes a 4000 watt, 825 incoloy stainless steel heater to keep your water warm for many years to come!

TSE-Ecospray® to Strengthen the Hot Tub Shell

The Aristech Acrylic Shell is sprayed with TSE-Ecospray, a modern polyurethane, which bonds to the ABS backed acrylic. This provides tremendous strength, an extra layer of insulation, and eliminates the concerns over using fiberglass. This two-component polyurethane material is designed specifically as an environmentally friendly alternative to polyester resin (Fiberglass).

TSE-Ecospray Substrate:

- is Styrene Free!
- has Zero VOC's (Volatile Organic Compounds)
- has Excellent Adhesion and Strengthening when applied to Thermoformed Acrylic
